Attachments: Proposed Districts for 2010 5A & 6A only.xls

Hello,

My last email I mentioned I would send you a 5 classifications model, but after reviewing it, it still needs work. I do however have another suggestion.

Instead of a set enrollment number to separated classes, how about using ranges? For example lets say that all schools over 1450 are 6A and schools between 1200 and 1450 could be 6A or 5A depending on locations of possible league opponents. I started working on a model for this and have attached only the 6A and 5A leagues. As I get more time I will finish the model in time for the next meeting of the committee.

Thanks,

Gary Jones
