October 17, 2022

TO: Athletic Directors and Wrestling Coaches
FROM: Kris Welch, Assistant Executive Director
SUBJECT: Female Events and Entering Female Match Data

OSAA Wrestling participation limitations allow schools sponsoring wrestling to schedule female only events during the season. This action will require member schools, with female wrestlers, have the ability to track match data in a different way. A separate "Girls" only account where data for female vs female matches can be added will be necessary because this will allow the use of various TrackWrestling tools to seed and bracket events during the season.

As such, TrackWrestling has issued all member schools a new email invite to set-up your "Girls" account. This account will be used to enter all female only events and female vs female match data. Mixed gender events and male vs female match data will continue to be entered into the "Boys" account.

Once you have activated your "Girls" account you will have the ability to enter your female only events and use other available tools. **If you have already listed female only events within your "Boys" account, please delete those events. You will be required to enter those events in the "Girls" account once activated**

Female vs female match data that occurs during any event should appear in the Girls account. The ability to use various TrackWrestling functionality is dependent upon coaches/statisticians entering match data into the correct account.

Female assessment data will be mass exported to all accounts on the evening of Thursday, May 13. This will populate your roster and automatically calculate weight loss plans that correspond to the following weight classes 100, 105, 110, 115, 120, 125, 130, 135, 140, 145, 155, 170, 190, 235.

When female vs female matches are contested they will follow the weight loss plan that corresponds to the weight classes listed above – when male vs female matches are contested they will use the adopted NFHS weight classes listed in the rules book. Female wrestlers will have two weight loss plans that schools will be required to manage because of the flexibility to choose to wrestler a female or a male during the season.

Below is a timeline summary of school responsibilities related to Girls wrestling. Thank you in advance for providing opportunities to female wrestlers.

October 17	TW invitations to activate Boys account emailed to all schools
Nov 14 – Nov 28	Schools enter female only events into Boys account
November 28	Mass export of female assessment data from Boys accounts to Girls accounts.
November 30	OSAA Wrestling first contest date
